Biopesticides labeled for use on cucurbit crops and the diseases specified on the label.

The first section contains products labeled for foliar and fruit diseases. Second column indicates products with label statement that it is for general disease control.
Information is included for products that are also labeled for soil-borne pathogens and diseases.
Below the first section there is information about products that can be used as seed treatments, products only for soil applications, and nematicides.

	Foliar and fruit diseases																		**Soil-borne pathogens and diseases**									
Biopesticide	**General disease control**	***Alternaria***	**Angular leaf spot**	**Anthracnose *(Colletotrichum)***	**Bacterial fruit blotch**	**Bacterial leaf spot**	**Bacterial wilt**	**Belly rot**	**Cercospora leaf spot**	**Charcoal rot**	**Downy mildew**	**Fusarium wilt**	**Gray mold *(Botrytis)***	**Gummy stem blight *(Didymella)***	**Monosporascus vine decline**	***Phytophthora* blight**	**Powdery mildew**	**Scab**	**Septoria leaf spot**	**General**	**Crown and root rot**	**Root rot**	**Damping-off**	***Fusarium***	***Phytophthora***	***Pythium***	***Rhizoctonia***	***Sclerotinia***	***Verticillium***
